About

CSE-AIML student and AI/ML engineer specializing in production-grade GenAI, RAG, and computer-vision systems. I build end-to-end — model training, backend APIs, and React/Next.js front-ends — and care about evaluation, latency, and UX as much as accuracy.

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++

ML: TensorFlow, PyTorch, scikit-learn, Hugging Face, LLMs

GenAI / RAG: LangChain, RAG, Vector DBs, Prompt Engineering, Embeddings

Computer Vision: OpenCV, OCR, Tesseract, EasyOCR, Face Detection

Backend: FastAPI, Flask, REST APIs, PostgreSQL, Prisma

Frontend: Next.js, React, Tailwind CSS, Git/GitHub, Docker

Featured Projects

AI Resume Screening & Candidate Ranking Agent

PDF/DOCX/TXT resume processing, JD matching, hybrid rule-based + semantic scoring, skill-gap analysis, explainable recommendations.

SAHAYAK — Multi-Agent RAG Educational Assistant

Multi-agent RAG (retriever, summarizer, fact-checker, quiz-master), Next.js + PostgreSQL + Prisma, streaming chat UI with cited answers.

AI-Assisted Online Proctoring

Real-time face detection, gaze estimation, multiple-face alerts, browser behavior monitoring, frame-level cheating analysis.

OCR & Computer Vision Pipeline

OpenCV preprocessing, TensorFlow text localization, dual OCR engines (Tesseract + EasyOCR) with fallback, Flask REST API with confidence scoring.

Experience

Frontend Developer — AI-assisted Proctoring Intern

HirePro Technologies · 2024 — 2025

Built reviewer dashboard components for live face detection, gaze tracking, and multi-face alerts.

Integrated browser behavior monitoring events. Collaborated with CV team to surface model confidence and cheating analysis. Shipped responsive, accessible components.

Certifications

Deep Learning Specialization (DeepLearning.AI) · TensorFlow Developer Certificate (Google) · NLP Specialization · Computer Vision with OpenCV & TensorFlow · LangChain for LLM App Development · PostgreSQL for Developers.
